

1.Features

- For surface mounted applications in order to optimize board space
- Glass passivated junction
- Built-in strain relief
- Excellent clamping capability
- Low profile package
- Low inductance
- Excellent clamping capability
- Fast response time: typically less than 1.0 ps from 0 volts to BV min
- Typical IR less than 1µA above 10V
- High temperature soldering guaranteed: 250°C/10 seconds at terminals

2.Mechanical Data

- Case: JEDEC DO-214AC Molded plastic
- Terminal: Solder plated, solderable per MIL-STD-750, Method 2026
- Weight: 0.002 ounces, 0.061 grams
- Polarity: Color band denoted positive end (cathode) except Bipolar
- Standard Packaging: 12mm tape (EIA STD RS-481)

3.Pinning information

SMA

4. Maximum Ratings And Electrical Characteristics

Parameter	Symbol	Value	Units
Peak Pulse Power Dissipation at $T_A=25^\circ\text{C}$, $T_P=1\text{ms}$ (Note 1)	P_{PPM}	400	Watts
Maximum Instantaneous Forward Voltage at 25.0A for Unidirectional Only	V_F	3.5	Volts
Steady State Power Dissipation at $T_L = 75^\circ\text{C}$ Lead lengths .375", 9.5mm (Note 2)	P_D	3.3	Watts
Peak Forward Surge Current, 8.3ms Single Half Sine-wave Superimposed on Rated Load, (JEDEC Method)(Note 3)	I_{FSM}	40	Amps
ESD Voltage per IEC6100-4-2	Contact	V_{ESD1}	± 30 kV
	Air	V_{ESD2}	± 30 kV
Junction Temperature and Storage Temperature Range	T_J, T_{STG}	-55 to 150	$^\circ\text{C}$

Notes:

1. Non-repetitive current pulse, per Fig.3 and derated above $T_A=25^\circ\text{C}$ per Fig.2.
2. Mounted on 5.0mm^2 (0.03mm thick) Copper Pads to each termina.
3. 8.3ms single half sine-wave, or equivalent square wave, Duty cycle=4 pulses per minutes maximum.

5. Electrical Characteristics ($T_A=25\text{ }^\circ\text{C}$ unless otherwise noted)

Notes:

For bidirectional type having V_{RWM} of 10 volts and less, the I_R limit is double.

The available parts are "A" type only, the parts without A (V_{BR} is $\pm 10\%$) are not available.

9.Disclaimer

UMW reserves the right to make changes to all products, specifications. Customers should obtain the latest version of product documentation and verify the completeness and currency of the information before placing an order.

When applying our products, please do not exceed the maximum rated values, as this may affect the reliability of the entire system. Under certain conditions, any semiconductor product may experience faults or failures. Buyers are responsible for adhering to safety standards and implementing safety measures during system design, prototyping, and manufacturing when using our products to prevent potential failure risks that could lead to personal injury or property damage.

Unless explicitly stated in writing, UMW products are not intended for use in medical, life-saving, or life-sustaining applications, nor for any other applications where product failure could result in personal injury or death. If customers use or sell the product for such applications without explicit authorization, they assume all associated risks.

When reselling, applying, or exporting, please comply with export control laws and regulations of China, the United States, the United Kingdom, the European Union, and other relevant countries, regions, and international organizations.
