1. CONSTRUCTION
AlGaInP orange visual light emitting diodes packaged with colorless epoxy.

2. USAGE
Source of light for auxiliary AF

3. DIMENSIONS
See Figure 1

4. ABSOLUTE MAXIMUM RATINGS (Ta=25°C)

[PACKAGING REQUIREMENTS]

1. PACKING
   (1) 1,500pcs are packed in one reel.
   (2) One reel is packed in aluminum bag.
       The size of aluminum bag is 380(a)×400(b)mm.
       The size up to 380(c)mm is to zipper.
   (3) Aluminum bag is sealed by pressured for all directions.

2. MARKING
   The following information shall be described on a box label:
   ROHM Type number, Packing quantity, Luminous intensity rank, Lot number etc.

[FORMER LABEL SPECIFICATION]

Note) Indicates bar code expressed by code 39.
indicates Pb-free Products.

[EXAMPLE OF LOT NO. MARKING]

Production facility sign
(Reference the manufactory list)
Serial number of lot
Production week
Production year
【ATTENTION POINT IN HANDLING】

This product was developed as a surface mount LED especially suitable for soldering. Please take care of following points when using this device.

1. DESIGNING OF PCB
   As for a recommendable solder pattern, Please refer to Fig-1. The size and direction of the pad pattern depends on the condition of the PCB, So, please investigate about the adjustment thoroughly before designing.

2. SOLDERING (Sn-Cu, Sn-Ag-Cu, Sn-Ag-Bi-Cu)
   LED products do not contain reinforcement materials such as glass fillers. Therefore, thermal stress by soldering greatly influence its reliability. The temperature conditions for reflow soldering should therefore be set up according to the characteristic of this product. (See Fig-2)
   Furthermore, a sudden heating or cooling of LED cause internal stress greatly and has a possibility to break the device. Therefore, thermal gradient shall be gradual as possible.
   Number of reflow process shall be max 2 times and these processes shall be performed in a row.
   Cooling process to normal temperature shall be required between first and second soldering process.

3. HANDLING AFTER MOUNTING
   In case outside force is given to the device, stress is concentrated to the jointed part between mold resin and substrate. Therefore please be careful when handling LED and PCB for there is a possibility to break the device or PCB.

4. WASHING
   Please note the following points when washing is required after soldering.
   4-1) WASHING SOLVENT
         Isopropyl alcohol or other alcohol solvent is recommendable.
   4-2) TEMPERATURE
         Below 30℃, immersion time ; within 3 minutes.
   4-3) ULTRA SONIC WASHING
         Below 15 / 1 litter of solvent tub.
   4-4) COOLING
         Below 100℃ within 3 minutes.

5. Erosion Gas
   Utilization in erosion gas atmosphere may degenerate the plating surface which might cause deterioration of solder strength, optical characteristics, or functions. Please take precautions against occurrence of gas from the surrounding parts on the occasion of custody, and also after mounted on circuit board.
6. STORAGE
   At reflow soldering, the reliability of this product is often influenced by moisture absorption so we apply the packaging with moisture proof for better condition is use, please also note that
   6-1) Not to be opened before using.
   6-2) To be kept in our moisture proof packaging with some desiccant (SILICA GEL) after opening it.
       To be baked in case the SILICA GEL indicator changed its color from either blue to clear or green to pink.
   6-3) Please use within 72 hours after the package was opened. (Condition at 30°C, max.70%Rh.)
       In case it is not used within 72 hours, please put it back into our packaging.
   6-4) BAKING
       Please bake under reel condition at 60°C, 40~48 hours (max.20%Rh) after un-sealing.
       While baking is done, the reel and emboss tape may be easily deformed.
       Please be careful not to give any stress.
【ATTENTION POINTS IN SOLDERING OPERATION】

This product was developed as a surface mount LED especially suitable for reflow soldering. So reflow soldering is recommended. In case of implementing manual soldering, please take care of following points.

1. SOLDERING OPERATION
   1) SOLDER USED
      Sn-Cu, Sn-Ag-Cu, Sn-Ag-Bi-Cu

2) SOLDERING CONDITION
   LED products do not contain reinforcement material such as a glass fillers. So thermal stress by soldering greatly influence its reliability. Please keep following points for manual soldering.

<table>
<thead>
<tr>
<th>ITEM</th>
<th>RECOMMENDED CONDITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Soldering iron</td>
<td>Less than 30W, top of iron less than 3mm.</td>
</tr>
<tr>
<td>b) Heating method</td>
<td>Condition ) Temp. of iron top less than 350℃ within 3 sec. Heating on PCB pattern, not direct to the LED. (Fig-1)</td>
</tr>
<tr>
<td>c) Handling after soldering</td>
<td>Please handle after the part temp. Goes down to room temp.</td>
</tr>
</tbody>
</table>

3) WASHING
   Please note the following points when washing is required after soldering.
   3-1) WASHING SOLVENT
         Isopropyl alcohol or other alcohol solvent is recommendable.
   3-2) TEMPERATURE
         Below 30℃, immersion time : within 3 minutes.
   3-3) ULTRA SONIC WASHING
         Below 15W/1 litter of solvent tub.
   3-4) CURING
         Below 100℃ within 3 minutes.

4) STORAGE
   At manual soldering, the reliability of this product is often influenced by moisture absorption so we apply the packaging with moisture proof for better condition is use, please also note that
   4-1) Not to be opened before using.
   4-2) To be kept in our moisture proof packaging with some desiccant (SILICA GEL) after opening it.
       To be baked in case the SILICA GEL indicator changed its color from either blue to clear or green to pink.
   4-3) STORAGE CONDITION
       Please use products in a sort time after opening the package. In case all parts are not used at the sometime, put the remaining back into ROHM package.
       Storage condition : (Lower than 30℃, 70% Humidity max. 72 hours.)
   4-4) BAKING CONDITION
       40～48 hours at 60℃, and humidity less than 20%
