**FEATURES**

- Miniature open frame package
- Epoxy coated
- Moisture resistant
- Spectral response similar to the human eye
- Applications include dusk-dawn lighting control

**SPECIFICATION AND PERFORMANCE**

<table>
<thead>

**Measuring Conditions**

1. **Light resistance:**
   Measured at 10 Lux with standard light A (2854K color temperature) and 2hr illumination at 400-600 lux prior to testing.

2. **Dark Resistance:**
   Measured 10 seconds after closed 10 lux.

3. **Gamma Characteristic:**
   Between 10 lux and 100 lux and given by
   \[ \gamma = \log(R10/R100) \]
   R10 . R100 Cell resistance at 10 lux and 100 lux.
   Error of \( \gamma \) is ± 0.1.

4. **Pmax:**
   Max. power dissipation at ambient temperature of 25 °C.

5. **Vmax:**
   Max. voltage in darkness that may be applied to the cell continuously.
